Krystian Radziszewski

Jr. Frontend Developer, freelancer

I specialize in designing responsive applications and websites in the front-end domain. Throughout the development process, I focus on utilizing the latest documentation provided by the official websites of selected frameworks. When designing, I emphasize optimizing pages for various browsers, incorporating modern techniques.

I am enthusiastic about facing new challenges, always ready to expand my skills and explore new areas in the field of front-end development. The dynamic nature of the industry fascinates me, and I strive to stay updated with the latest trends and technologies. I enjoy collaborating with teams because I believe that diversity of perspectives translates into creating more innovative solutions. Meeting new people and working together not only contribute to my professional development but also serve as a source of inspiration for me

EXPIRIENCE

05.2023 - present
2nd Floor Studio
Frontend Developer

- **Creation of reusable components**: I design and implement reusable components that contribute to a cohesive and scalable application structure. I follow best practices of object-oriented programming to ensure easy maintenance and code extensibility.
- **Bug fixing:** I systematically identify and eliminate bugs in the code, ensuring the smooth operation of the application. I conduct tests and debug to guarantee high usability and minimize the risk of potential issues.
- **Design improvement:** I actively collaborate with the design team to enhance the aesthetics and usability of the user interface. I strive for continuous design improvement, considering the latest industry trends to create visually appealing and modern projects.
- **Performance optimization:** I consistently monitor and optimize the performance of websites or applications in terms of loading speed and responsiveness. I focus on minimizing and optimizing the delivered content, translating into a better user experience.

2022 - present
Freelancer

- **Designing and developing responsive websites:** I create websites from scratch with a focus on responsiveness, ensuring adaptability to various devices and screens. I prioritize an intuitive user interface to provide a pleasant experience for visitors.
- **Creating graphics and visual elements:** I design graphics, user interface elements, icons, and other visual elements that seamlessly integrate with the overall design of the website. This is done to achieve a consistent and aesthetic appearance.
- **Customizing projects to meet client's individual needs:** I consult with the client to understand their requirements and expectations for the project. I customize the project to meet unique needs, taking into account individual preferences and the client's business goals.
- **Testing and revisions:** I conduct functional and visual tests on the website, identifying any errors and implementing necessary corrections. I ensure that the final product meets the highest quality standards.
